

# Prepare for onboarding!

Your teams are ready to start . Let's take a look at what's next:

Avatao sends automated emails to users regarding various actions like invitations, registration, new assignments, reminders, and more. It's important to make sure your company's mail server lets these messages through - don't want necessary updates ending up in the spam folder!

## Before sending out invitations

Once we've created your organization, the appropriate admins and owners will receive an invitation through which they can register and complete their onboarding process.

## Using SSO

Are you using SSO? If you are, just let us know and we'll set it up for you in no time! Here's a list of all the supported SSOs:

<https://auth0.com/docs/identityproviders#enterprise>

## Sending invitations to members

When it comes to inviting members, you have three options:

- **Send registration links directly:** Straightforward, but you can't follow up on registrations with this method, so we recommend the next option.
- **Use email/CSV invitations:** Easy to follow up on, plus you can send reminders to users who haven't registered yet.
- **Invite directly to Teams with the "Invite members" button:** Once you're in a Team, you can simply click this button to invite members directly.

We hope that this information was helpful. If you have further questions about the onboarding, or any other processes, please get in touch with us through [customersuccess@avatao.com](mailto:customersuccess@avatao.com)
