

About Teams

Teams allow you to group together Members with the same assigned training plan. Creating a Team will make it easier to assign modules and follow up on how Members' training is going. You can even compete with other Teams!

The Teams are structured based on the survey we completed earlier. So now that you have a good idea of what your Team should look like, it's time to create some.

You can always add new Members to a Team using invitations. And don't forget, even if a user hasn't registered yet, you can still send them an invitation, as the Team invitation link also works as a registration link to the platform.

That should be enough about Teams to get you started! If you have any questions or anything is unclear, reach out to us at customersuccess@avatao.com.
